## Description ^

Pallet forks are an excellent piece of equipment to add to your repertoire of tractor parts and supplies. They allow you to pick up hefty materials and transport them. You can carry lumber, logs, timber, and firewood. You can also use pallet forks to help you move and install fence posts. They're also great for moving around hay bales, making them an essential asset on the farm. At Titan, we are dedicated to making the best pallet forks out there. To accomplish this, we use high-quality, superior material that is made to last. This attachment, in particular, is made from heavy-duty steel, so it can withstand large weight capacities of up to 5000 lbs. Because it's made from steel, it will also weather the elements with ease. You don't need to worry about it rusting or corroding; it is sure to last you for years to come! It features a CNC-cut and has been welded for a more precise fit. Its laser-cut, branded headache rack is made from a single sheet of steel for further reinforcement. It has also been powder-coated, making it weatherproof. To hook up your pallet forks, use the angled quick tach system. This system allows the operator to tilt the forks upward to help prevent loads from falling off. You'll also find 2 bolted steps that make it easy to access your loader from either the left or right. The pallet forks measure at 48" in length. The overall attachment is 45.75" in width, and it has a height of 39". It weighs about 184 lbs. It also features lock guard protection for your convenience. Additionally, the added spear sleeves make it easy to add bale spears. It's time to simplify your life by investing in this sturdy piece of equipment. Add it to your tractor parts and accessories today to start living your life to the fullest.

**IDEAL FOR HEAVY LIFTING:** When you need to complete a heavy lifting job, trust these pallet forks by Titan Attachments. These pallet forks are ideal for moving and transporting logs, lumber, timber, and firewood. You can also use them to help you install fence posts. Use them to clean up debris and brush too.

**POWERFUL CAPACITY:** With a lifting capacity of up to 5000 lbs., these pallet forks can carry plenty of hefty materials. They're designed to carry heavy objects without taxing your equipment. Don't strain your machinery trying to carry around large loads. Instead, invest in this handy pallet fork attachment.

**STRONG STURDY MATERIAL:** This attachment is made from heavy-duty steel material, making it extra durable and strong. Because of its all-steel construction, it can withstand the most rigorous work. It's been CNC-cut and welded for an accurate fit. It also features a laser-cut and branded headache rack made from a single sheet of steel.

**EASY INSTALLATION:** Setting up your pallet forks is incredibly easy. They come with an angled quick tach connection that makes installation simple. Additionally, the angled quick tach system allows the operator to tilt the forks upward to prevent loads from sliding off. There are also 2 bolted steps that make it easy to access your loader from either side.

**DIMENSIONS:** These pallet forks measure 48" in length. It has a width of 45.75" and a height of 39". The frame weighs approximately 184 lbs. The pallet blades are adjustable from 6.5" to 44". When you place your order you will need to provide your phone number so the trucking company can schedule delivery.

### Excellent!

I use these pallet forks on my 55hp utility tractor. They arrived very quickly after ordering. The quick attach works easily and is well made. The forks adjust simply and stay put. I'm very satisfied with my purchase and recommend it!

Good forks

Good stout forks, but I had to cut the main spear sleeve back since it rubs on the hydraulic cylinder on the hydraulic quick attach on my Kubota SVL95-2s. I was planning on using it for a bale spear too, but it won't work since you can't get the nut on the back of the spear due to the cylinder being in the way.
