

Titan 72" Tooth Bar installed on the HLA 72" Bucket

Description

The heavy duty tooth bar from United Attachments is perfect for digging up compacted soils, sod, and gravel with your current bucket attachment! The simple bolt-on design eliminates the need for a second bucket, protects the cutting edge, and improves digging efficiency of your loader. It is very easy to install! Simply drill 2 holes in both sides of your bucket, bolt on the tooth bar, and your machine is ready for work.

Features:

- Bolt-on design for easy removal
- Custom cut for 72" inside bucket width
- Protects bucket's cutting edge
- Eliminate the need for two buckets
- Tooth Part #: 23TF
- Made in the USA
